## VITAL CL

(ANTI-CELLULITE)

MTS ROLLER CARE ESSENTIALS

**Ingredients:** Water, Calcium Disodium Ethylenediaminetetraacetate, Magnolia Officinalis Bark Extract, Butylene Glycol, Hydroxyprolisilane CN, Machilus Thunbergii Bark Extract, Caffeine, Butcherbroom Root Extract, Tea-Hydroiodide, Ivy Extract, Carnitine, Tripeptide-1, Carrageenan, Disodium EDTA, Catuaba Extract, Marapuama Extract, Pfaffia Extract, Methylsilanol Carboxymethyl Theophylline Alginate, Prenoxyethanol, Xantum Gum

**Use Direction:** Apply entire solution evenly on the treatment area before, during and after MTS Roller Treatment. Gently massage into skin until absorbed. For more details refer to MTS Roller Training Video or MTS Roller Use Protocol Packet.

**Cautions:** For professional and external use only.

### Vital CL Key Features:

**Caffeine, Butcherbroom Root Extract, Tea-Hydroiodide, Ivy Extract, Carnitine, Carrageenan, Disodium EDTA** in this formula offers a fully integrated approach, combining adipocyte inhibition, lypolytic activity, microcirculatory reactivation, and toxin scavenging for maximum efficacy, thereby providing a unique solution to the problem of fighting cellulite.

**Tripeptide-1** acts as a scavenger for by-products of lipid peroxidation, enhancing the effectiveness of the other components to fight cellulite and prevent adipocyte maturation.

**Hydroxyprolisilane CN** is a hydrosoluble derivative of organic con, stimulating the multiplication of cells and is capable to enhance the cell renewal in a very significant manner.

**Catuaba Extract, Marapuama Extract, Pfaffia Extract** are standardized in saponis and flavenoids, showing significant increase of free fatty acid release in floating human adipocytes culture by 0.30 m Eq/L after 48 hours, causing drastic reduction of Intracellular lipid droplets, increasing skin temperature on the stomach and the thighs, thereby resulting in an increase of the microcirculation activation effect. It also improves the orange peel aspect characteristic for cellulite.

**Machilus Thunbergii Bark Extract** act as an Anti-cellulite effect, based on its abilities from inhibition of lipid accumulation (Adipocyte Differentiation) through down-regulation of PPARs, HSL, LPL, Leptin, etc.

**Magnolia Officinalis Bark Extract** is one of the most effective humectants for skin healing and regenerative properties of the human skin and will add hydration to skin and does not depend on atmospheric moisture.

**Methylsilanol Carboxymethyl Theophylline Alginate** has effects on lipolysis in the adipocytes which confirms the results of the experiment on adipocytes in vitro and the tropicity and degeneration of the proteoglycans or acid mucopolysaccharides in elastic fibers and collagen AND on tissular permeability and thus the resorption of local oedema

MTS Roller Care Essentials (0.12 fl.oz. / vial X 10 vials/ box)

The clinical solutions to be used with Microneedle Therapy.
